2025 NORTH ATLANTIC HURRICANE SEASON FORECAST

The [Colorado State University \(CSU\) 2025 Hurricane Forecast](#) estimates that this upcoming hurricane season will be more active than average, with 17 named storms (about 3 more than average), 9 of which will be hurricanes (about 2 more than average) and 4 of which will be a category 3 or higher hurricane (about 1 more than average). Before this season begins, it's essential that you take the time to prepare your unit for any potential weather events.

For nearly a decade, RRS RESPONSE LOGISTICS has been providing safe, efficient and customized solutions for businesses impacted by hurricanes. From disaster response to logistics support and food service operation support, Response Logistics is your trusted solution from preparation, client communication to response.

ONE CALL. ONE TEAM. TOTAL SOLUTION.

Situational Awareness

24-Hour tracking and communication

Response Logistics continuously monitors weather activity in the Atlantic, Pacific and Gulf Coast. Clients receive exclusive notice of potential threats, state plans, and key update communications, so they can quickly activate their storm protocol cadence, communicate with their clients and prepare their unit for anything that comes their way.

Business Intelligence to Your Unit 24/7. Response Logistics Update Network:

State and local updates

Key personnel communication. travel authorization letters

Power outage mapping

Real time weather data

Trained personnel support

24/7 coverage

Advanced monitoring of communication traffic

Risk management support

From Start to Finish:

Hurricane Season begins June 1st and ends November 30th each year.

PRE-STORM PLANNING

AHEAD OF STORM SEASON:

Establish an emergency plan and review it throughout the year.

Designate an Emergency Response Team (ERT).

Inspect and replenish emergency supplies.

Update emergency contact list, which includes key vendors and local authorities.

Establish communication protocols.

Keep an updated list of all building staff that includes their full name, phone numbers, and assigned calling sequence.

Confirm evacuation procedures and plan to account for staff after an evacuation.

Complete basic preventive maintenance.

Check the National Weather Service for hurricane information daily until the end of November.

PRE-STORM PLANNING

AHEAD OF AN IMPENDING STORM TRACK:

Determine power outage plan, secure generator if necessary. Stock enough fuel for several days.

Fill all vehicles with fuel.

Secure or remove outdoor furniture, signage, loose debris, and equipment.

Evaluate flood and water hazards, sandbag as necessary and inspect any pre-established pumps.

Test fire alarm system and CO detector.

Move vehicles/carts into a safe sheltered area.

Remove debris surrounding storm drains and catch basins.

Clean loading docks and storage areas.

Schedule grease receptacle removal.

Charge all electric vehicles, backup batteries.

PRE-STORM PLANNING

ESSENTIAL FOODSERVICE PLAN:

Contact your bottler partner and schedule pallets of water to be delivered which can be picked up if not needed.

Determine meal count requirements. For Universities identify estimated students riding out the storm.

Develop communication plan in absence of WIFI, internet and potentially cell phone service. Pre-establish communication points on campus.

Print FEMA essential worker document for travelling during shutdown, curfew or otherwise impassable road conditions

Establish temporary housing contacts with local hotel for key personnel.

Establish alternate food program if necessary.

Stock shelf stable boxed breakfast and lunch for the first 24-48 hours post storm.

POST-STORM PLANNING

EXAMPLES OF POST STORM SCENARIOS TO CONSIDER:

Wind/storm damage

From boarding up broken windows to roofs missing.

No running water

Flooding

loading docks to entire units under water.

No sewer/utility

Extended loss of power

power can be out to the unit for 5-10 days, protecting product, service planning is key

No laundry/shower/
restroom facilities

Your Employees and Your Community

A natural disaster affects everyone in the community. This means your customers, your clients, and your employees will need help also. Be prepared with the necessary resources for you entire community.

Business Continuity Planning

Post storm implications can be unpredictable

Natural disasters pose a threat to the survival and success of your business. The key to a quick recovery requires thorough preparations. Consult with a disaster response company, such as RRS Response Logistics, as you build your business continuity plan

Identify how long your business can survive interruption

Emergency plan that ensures the safety of your employees, guests, and business.

Devise alternate plans for infrastructure and equipment support

Make copies of lists of your key vendors and contact if power and internet become unavailable

Engage and pre-commit with a response company

Understand the implications to your workforce

Key Vendor Resources

IT TAKES A VILLAGE

Paperwork is minimized with compliance and support from a trusted network. By using a pre-approved vendor, it ensures our personnel and resources are ready for immediate deployment following a disaster. RRS's strategic team facilitates client-developed disaster scenarios and table-top exercises preparing key personnel with the knowledge required for a quick response. During a natural disaster, we keep safety and insurance requirements at the forefront of our operations. Our leadership and recovery specialists establish a primary workspace, our mobile command center, providing a centralized command to provide and deliver all essential resources to your unit throughout an event.

Offering turnkey disaster services strengthens client satisfaction, drives account retention, and expands VA spend beyond daily operations. Proactive support positions us as a critical partner when clients need us most.

Expanding Value Through Disaster Response

Clients seek partners who deliver solutions beyond daily operations.

Offering turnkey mitigation services strengthens:

- Client satisfaction
 - Account retention
 - Category VA spend growth
-

Full-spectrum support positions us as a trusted, essential partner when it matters most.

Plan Assessments

When developing your Business Continuity Plan, RRS conducts facility assessments and pre-loss meetings with key personnel to discuss critical needs and other issues concerning your operations. The goal is to maximize your business's protection and minimize its risk. Critical information is gathered and stored, providing you better insight into your properties, resources, and operations.
